# THE ORIGINAL SINCE 1980

Rollerblade® brought the sport of inline skating to the world and continues to perfect our singular focus:

## AUTHENTIC PRODUCTS FOR A TRUE EXPERIENCE

This core value is applied to everything we do: products, website, corporate culture, customer service and global programs, to ensure anything we create or share exceeds its expectations.

## THE ROLLERBLADE® EXPERIENCE, the official resource for everything skating.

Our website provides a wealth of information to share and enhance the experience of inline skating. When visiting The Rollerblade® Experience, one can choose from a variety of categories to help them get rolling as quickly and safely as possible. To name a few:

**CHOOSING SKATES** - which models could be best for the desired usage and skating needs

**SKILLS** - strides, stopping, turns

**SKATE MAINTENANCE** - inspecting skates, rotating wheels, replacing brake pads

**TRAINING** - tips for skating a marathon

**EVENTS** - find skating marathons and inline contests around the world

**NEWS** - Learn about our team riders, skate related stories and how to connect with other skaters

**ROLLERBLADE® TV** - Check out the latest videos made by our skaters

**FIND A ROLLERBLADE® RETAILER** - search local and on-line dealers

The official Rollerblade® International Facebook page engages consumers to chat with us and with each other about skates, places, tips, workouts, events and where to buy.

Consumers ask questions, make suggestions and provide us with ongoing dialogue on a daily basis. This interaction helps us keep the pulse of skating going with a broader perspective and understanding of trends, opinions and needs from all around the world.

# WHEELS BETTER WHEELS FOR BETTER SKATING.

Hydrogen wheels deliver unmatched performance, power and response. The proprietary urethane formula, scooped cores and hub integration combine for optimal resilience, roll and rebound. The urethane has more grip, longevity and reduces vibration. The core is strategically designed to add flex for more power and energy into the stride. These are bonded together so the hub properly supports the urethane for consistent performance, speed, cornering and momentum with less effort.

Supreme wheels are engineered to provide maximum roll, grip, speed and wear. These high performance inline wheels use an improved formula to enhance rebound, add more footprint for control, maintain speed trough cut the skate strides and deliver a true upgrade for power, response and performance.

Rollerblade® wheels are strong, durable and soft enough to absorb vibration and allow for excellent grip so inline skaters can enjoy a smoother ride. 84A hardness wheels are more durable to withstand the elements of rougher outdoor surfaces and can be faster on most surfaces. Rollerblade® wheels come in a variety of sizes and durometers to maintain the right amount of control and speed while providing excellent performance for all levels of skaters.
